The Physique of Genius.
 Of certain peculiarities of genius Dr. Andrew Wilson writes: "It is no uncommon thing to find your genius a physically weak man. It is not your robust, hale, strong individual we have in our mind's eye as representative of the usual type of the genius. Contrarywise, most of them have been weakly and many ailing. Gout, we are told, marked Harvey, Milton, Gibbons, Newton and Samuel Johnson, and consumption marked Keats, Pricely, Sterne and Blake for its own. The phthisical notes are noted to be of restless disposition, eager and feverishly active, while the pouty type is more passive, with patient energy, slowly but surely dominating its task. We can make pictures of Keats and the great lexiconographer as illustrative of this contrast."

HERE you have a single-breasted and a double-breasted sack suit as made by The House of Kuppenheimer. A selection of either one of these garments is largely a matter of personal preference.

A sack suit, you know, is the kind you see most often. All manufacturers make them—in a way—but to get a garment of this kind, which because of its style and tone is not commonplace and has not that ordinary "everybody-and-everywhere" appearance, there is but one course to pursue.

Come to us. Simply because we are the exclusive representatives of The House of Kuppenheimer, makers of the finest suits and overcoats for men. We invite your inspection.

We take especial pride in the excellent fit and good style of the Spring Suits we've provided for youths and boys. We can show you the correct shapes and shades in Soft Hats and Derbies, also an up-to-date line of Furnishings.

Persistence In Advertising.

Persistence is an essential in successful business building. Occasional advertising—advertising just once in a while, when some solicitor unusually glib happens along—will not pay. One must keep hammering with steady, well-directed blows to accomplish the grand end for which all advertising is designed. One can pour a hoghead of water on a plank floor and not break a fibre in a single plank; but the steady dripping of water, a little particle at a time, wears away the solid granite. That is nature's object-lesson in persistence.

Get a competent, long experienced advertising agency to advise you into what channels to direct your persistence—an agency that has tried the courses, explored the regions and knows the way—an agency such as the Massengale Advertising Agency, of Richmond, Va., and Atlanta, Ga. They have plotted many a business ship out of the narrow river on to the high sea of success. They know the advertising business. Correspondence is cordially invited.
